

A Big Bang for Sustainability in 2024!

Greetings, Sustainable Speakers!

On January 8th, 2024, the Sustainable Speakers Club kicked off the new year with a bang! Our special focus month was a testament to the power of resolutions with a unique twist – a focus on sustainability.

Captivating Stories, Inspiring Resolutions

Speakers took the virtual-stage with titles like "Dreams and Ripples", "Saving Private Ryan," and "Appreciation," sharing personal, motivational viewpoints on setting sustainability-based resolutions. The art of storytelling, a cornerstone of Toastmasters International, was employed to convey powerful messages and ignite inspiration.

Diverse Membership Energizes the Club

Our club is witnessing a surge in new members, both individuals with personal and professional interests in sustainability and seasoned Toastmaster veterans passionate about adapting to the sustainability movement. This blend brings a unique connectivity, fostering a

renewed collective purpose for both sustainability and traditional toastmasters through the Sustainable Speakers Club

Unveiling the Breadth of Sustainability

Is sustainability too narrow a focus? Absolutely not! Our speakers inject creativity into every meeting, exploring themes ranging from food choices and future scanning to mindful consumption of resources. Members bring personal creativity, ambition, and contributions to climate change discussions, ensuring a diverse and engaging experience.

The Toastmaster Formula for Success

Our meetings follow the key Toastmaster formula, infusing structure and life into every session. From agenda structure and ruthless timekeeping to technical evaluations and pathway learning, the club provides a dynamic platform for members to thrive in their quest for improved communication skills.

Creativity Unleashed: A Glimpse of Titles

From "My Vacation in Kruger" to "Dreams and Ripples," "Saving Private Ryan," "Appreciation," and the humble "Three Little Pigs," creativity knows no bounds. Each title offers a unique perspective, and if you're wondering how saving a whale, the value of a pound of drugs, and sustainable home-building materials in Europe and Japan all connect – you'll just have to join us next time!

As we navigate the complex choices of sustainability in our daily lives, the Sustainable Speakers Club provides a structured and supportive environment to share thoughts, research, and experiences. Join us for our next meeting, and let's continue to breathe life into the world of sustainability and effective communication.

Congratulations to Kara Dulai on the publication of her university blog. Article titled “My journey to Veganism” read here: <https://studentsunionucl.org/articles/my-journey-to-veganism>.

Kara reflects on her journey to veganism, influenced by the film 'Cowspiracy' (released in 2014), which explores the impact of animal agriculture on the environment (climate change, water usage, deforestation) persuaded her to go vegan in 2016.

Register for our Themed Events and meetings :

A big thank you to Catherine Barrett who is a valued member of both our club and PR team and has been the biggest contributor to this months newsletter. She has aptly captured our first meeting of 2024 and reflected how the club is shaping and unfolding.

Cheers to a sustainable and eloquent 2024!

Please feel free to book a time slot with me via the link below to chat about club or if you have any questions.

Warm Regards,

Kavita Dulai DTM
